THE INNOVATIVE
ROLLER SHUTTER SYSTEM

Vegas Prime

Vegas Prime is a new modular roller shutter system, unique for combining modern design and universality.

Vegas Prime is the first modular roller shutter system that can be adapted as a regular or external roller shutter or can be integrated into the wall of the building as an in-built roller shutter. It is the best choice for those who value style and originality together with practicality.

Vegas Prime takes its name after the idea to reinvent a new roller shutter system, setting new standards in terms of design and manufacturing. The aim was to create a box differing in shape, from the ones available on the market for years, giving rise to a new trend that will stand out both visually and technologically, and ensure satisfaction of final customers and easy and comfortable assembly for manufacturers.

Vegas Prime. Design and Universality

Vegas Prime is the first modular roller shutter system that can be adapted depending on the needs of a customer. It can be mounted as a regular external roller-shutter, on the wall or in the window space. It can also be integrated in the wall of the building, hidden in the wall as a built-in roller shutter.

Vegas Prime is the system that guarantees simple and easy assembly and mounting. The box has specially shaped markers for technicians to enable drilling and special hangers, to facilitate mounting of ready-made roller shutter.

- ① Vegas Prime **shape and design** prevents any excess of water, snow, dust to remain on the roller shutter. Your Vegas Prime roller shutter will stay clean and tidy at all times throughout the whole year.
- ② **Integrated insect screen** - up to 250 cm high. It is equipped with a brake that slows down the insect screen when rolling up.

- ③ **Rear profile** - available in different heights depending on the needs. Wherever budget version is required 108mm rear profile might be used to lower the cost of the roller shutter.
- ④ **Revision profile** - in case of service, the box may be revised from the bottom. Thanks to wide range of colours, it suits everyone's needs.
- ⑤ **L-slat profile** - makes it easy to transform Vegas Prime roller shutter, into a built-in roller shutter ready to be incorporated into the wall of any building, at any time.
- ⑥ **Styrofoam fillers** - covers the roller shutter box making it easy to apply wall external insulation. In addition it tunes out the sounds coming out of the roller shutter making the roller shutter operation very quiet.
- ⑦ **Box side covers** - mask all imperfections of front cover's cut sides. No screws or rivets are visible from outside.

Vegas Prime. Variants

Vegas Prime . Solution for everyone

Vegas Prime is a universal system: it can be adapted to individual needs of the customer at any stage of production or mounting. It may become any type of roller shutter in seconds and can be mounted easily in a desired way.

- **Vegas Prime VP138-M:**
 - size: 154 mm x 143 mm
 - maximum roller shutter curtain height: 160 cm
 - revision: bottom
 - maximum insect screen curtain height: 250 cm
 - mounted on the building facade with grips and wall handles with the use of which the box can be hanged on the wall

- **Vegas Prime VP138-1-M:**
 - size: 159 mm x 160 mm
 - maximum roller shutter curtain height: 160 cm
 - revision: bottom
 - maximum insect screen curtain height: 250 cm

- **Vegas Prime VP165-M:**
 - size: 183 mm x 170 mm
 - maximum roller shutter curtain height: 239 cm
 - revision: bottom
 - maximum insect screen curtain height: 250 cm
 - mounted on the building facade with grips and wall handles with the use of which the box can be hanged on the wall

- **Vegas Prime VP1165-1-M:**
 - size: 190 mm x 182 mm
 - maximum roller shutter curtain height: 239 cm
 - revision: bottom
 - maximum insect screen curtain height: 250 cm
 - mounted on the building facade with grips and wall

- **Vegas Prime VP205-M:**
 - size: 225 mm x 211 mm
 - maximum roller shutter curtain height: 205 cm
 - revision: bottom
 - maximum insect screen curtain height: 250 cm
 - mounted on the building facade with grips and wall handles with the use of which the box can be hanged on the wall

- - size: 225 mm x 211 mm
 - maximum roller shutter curtain height: 205 cm
 - revision: bottom
 - maximum insect screen curtain height: 250 cm
